Please note that this is an indicative, sample CV and only a representation of what could be included in a CV.

The Skills CV is a format that is particularly useful when you have lots of experiences, but they are not directly relevant to the job that you are applying for. This means that they can be really useful for a more experienced person when they are looking to change career. In this example Amit is looking to move from one career to a another career. It also might be useful for someone at the start of their career who has lots of extra-curricular activities – like volunteering, caring responsibilities, sports or positions in society committees – but no work experience.

Amit Sahitnorli Verma

Profile

Dynamic climate research analyst with experience in data-driven analysis and community-based climate initiatives, currently pursuing a Master's degree in Environmental Science. Eager to join a sustainability-focused organization to leverage research and analytical skills in addressing the impact of climate change, particularly in Indian ecosystems.

Skills

Project Coordination: Organised and managed multiple environmental projects for the Delhi Green Network. Led a team of 5 in executing data collection initiatives for climate research.

Communication and Outreach: Developed public engagement programs for climate action, communicating complex information effectively to diverse audiences.

Data Analysis: Skilled in analysing large data sets using Python and R, with a focus on climate pattern interpretation and forecast accuracy.

Adaptability and Resilience: Continuously improved in response to constructive feedback and adapted quickly to new challenges in climate research environments.

Relationship Building: Proficient in collaborating with cross-functional teams, fostering relationships that support sustainability initiatives and research goals.

Work Experience
